

FLASHBACK ARRESTOR TESTING MACHINE

Simply and quickly test the flame arrestor and thermal cut-off valve function of flashback arrestors.

Features:

1. Electronic ignition system for more accuracy.
2. Transparent tube for easy distinguishing.
3. With safety devices for safe operation.
4. Use quick couplings for fast assembling and disassembling.

How to use:

1. Connect the welding tip and ignite it to adjust to a neutral flame.
2. Connect the tube, open valves and press the ignition button to test if the machine is working properly.
3. Follow the arrow direction to connect the flashback arrestors to the tube.
4. Open the valves and press the ignition button. Observe the viewing chamber, if there is no flash, which means the flame arrestor of the flashback arrestor is functional.
